Data-Driven Shopping: Qrimp E-Commerce

Completely Custom Shopping Sites

Your customers want to buy your products online, and you want to give them a fast, accurate and secure shopping experience.

Qrimp E-Commerce is a flexible solution that gives you a live inventory database on the web, so you can sell products and update descriptions, prices and more – any time.

A custom designed Qrimp shopping site

E-Commerce you can Manage

- Import inventory from a spreadsheet
- Change prices easily
- Payment integration with PayPal or Authorize.Net
- Select a featured product or products and rotate daily, weekly or whenever!
- Easily hide products from public view
- Upload product images, change them any time with image swapper
- Next/Previous item browsing
- Store wholesale and retail prices
- External website immediately reflects changes to inventory
- Can be custom designed and laid out

Static vs. Dynamic Website Content

Static web sites contain content that must be programmed and then manually pushed up to the web when changes are made.

Dynamic websites such as Qrimp E-Commerce communicate with databases over the internet. You can edit your Qrimp system from the web interface. This lets you keep the information on your website up to date easily.
